

Smart Office Tools

Regent Healthcare Systems Inc.

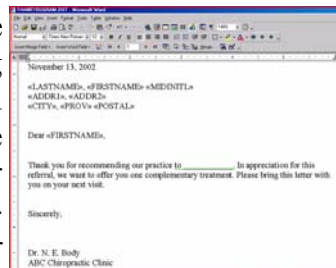

SmartSeries Office Tools

Regent Healthcare Systems' **SmartSeries Office Tools** is an easy to use, add-on tool to enhance your SmartSeries Professional system. The module integrates Microsoft Office 2000 or Office XP with your SmartSeries system to provide e-mail connectivity through Outlook, word processing through Word and reporting using Excel.

E-Mail - Sending your clients or a group of clients an e-mail has never been easier. Send appointment reminders, information updates or simply say hello. The e-mail contents are stored under each patient's name enabling you to keep a record of your communication.

Documents - Need to send a referral letter? Update your patient in regard to test results or a marketing mailer? Using Smart OA and Microsoft Word, you can create any number of letter templates and merge the patient demographic information to send to your patient. Thank-yous, birthday letters, referrals, imagine the possibilities! All documents are stored under the patient name for easy access and recall.

Reporting - Need to do some data mining? You can extract it from SmartSeries and save it to an Excel file. An ideal component for those performing research projects.

Making SmartSeries
... Smarter.
